

THORR

To satisfy the requests of the specialists as well as the mountain bike enthusiast, Campagnolo has introduced a new line of rims specifically divided into two types. These rims are the results of extensive field testing with many of the top professional racers in mountain biking today: The rim names are Thorr and Contax.

Both of these rims have a very high degree of technical innovation, reliability and resistance to extreme conditions. The use of special alloys has allowed Campagnolo to obtain an extremely light and durable rim. We have derived the shape of these rims after a long and accurate CAD study. This style of rim will make braking more efficient and positive.

The use of traditional cantilevers as well as caliper brakes are possible with Thorr.

CAT. NO.	TYPE	FINISH	WIDTH mm	DRILLING	WEIGHT ~ gr.
P0504	THORR	HARDOX	22,8	28-32-36	421
P0514	THORR	OXIDE	22,8	28-32-36	421
P0524	THORR	POLISHED	22,8	28-32-36	421

Contax has been designed for the most demanding competition. It's compact cross section design and light weight make it ideal for racing applications.

This rim has a very high resistance to deformation. The unique design of the sidewalls will provide the most efficient braking possible. Even in the worst conditions. In the event of a flat tire, especially in competition, the tire may be easily changed without the use of tools.

This is a considerable advantage in a competition where no technical assistance is allowed and only a few seconds may make the difference between winning and losing.

CAT. NO.	TYPE	FINISH	WIDTH mm	DRILLING	WEIGHT ~ gr.
P0534	CONTAX	HARDOX	20,0	28-32-36	397
P0544	CONTAX	OXIDE	20,0	28-32-36	397
P0554	CONTAX	POLISHED	20,0	28-32-36	397
